freelance research
Posted by smita - 2006/07/16 22:45

Hello

I am based in India and have more than 5 yrs market research experience including use of SPSS for analysing data, designing questionaires and doing data analysis. Have experience in wide list of sectors like telecom, fmcg, financial products.

I am looking for freelance work working from home on a commercial basis. If any one can offer me work please get in touch me at choudharysmita@yahoo.com.

Thanks

Smita

Re:freelance research

Posted by Jo Lewis - 2007/01/15 05:35

Hi Mark

We frequently freelance for private and public organisations in addition to providing extra resource for market research agencies when required. We would be delighted to assist you with your research in the financial sector.

We have 11 years experience of market research which includes work undertaken within the financial services sector. Additionally one of the partners in our business was previously a fully qualified financial advisor with six years experience

in the industry.

Please contact us and we will gladly discuss the project further, along with giving you an indication of our rates.

To find out more please email jo@cogentresearch.co.uk, call 01745 560089 or visit www.cogentresearch.co.uk

We look forward to hearing from you

Kind regards

Jo

Re:freelance research
Posted by Imran Syed - 2008/02/29 10:33

Dear Alicia,

I would like to learn more about research in the financial services sector. I am going to join an MBA program this Fall and plan to work in the Financial services industry (either client side or agency side). I would appreciate it if you could give me more comments about life in this industry, if possible please give me your phone number and I will give you a short call from Singapore.

Thanks and best regards,
Imran

Re:freelance research
Posted by Nick - 2008/05/07 04:54

Hi everyone,

I am freelancer seeking for jobs in data processing for market research companies (cleaning and tabulations) and data mining. Job experience: 4 years as head of analytical department in market research company; 3 years as a consultant and trainee in SPSS Inc.; now works as market analyst in large telecom.

I can analyze your data using various methods such as: analysis of variance, GLM, correlations, linear and non-linear regression, binary and multinomial logistic regression, cluster, discriminant, factor, conjoint-analysis (if you have specific data for it), multidimensional scaling, decision trees (CHAID, C&RT, C5.0 and QUEST), neural networks, Kohonen networks, association rules (GRI, Carma, Apriori), time series analysis (ES, ARIMA).

If interesting please contact me by nsyrov@gmail.com.

Best regards!
